DETAILED ACTION

Respons to Amendment

1. Applicant's amendments and accompanying remarks filed 4/10/00 have been entered and carefully considered. Applicant's amendment is found to overcome the 112 indefinite rejection set forth in the previous action. Despite this advance, the amendments are not found to patentably distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Election/Restrictions

2. Applicant's election without traverse of group I, claims 17-24, in Paper No. 20 is acknowledged.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 17-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended the claims to include the phrase "unpolymerizable with radiation." This limitation is not supported in the originally filed specification.

Claims 17-24 are also rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The polymers applicant's claims are inherently polymerizable with radiation. The specification does not describe a method to render these polymers "unpolymerizable with radiation."
